

Draft Inventory of Sustainability Researchers

School of Science and Engineering

Tulane University

The STARS Sustainability Tracking, Assessment, and Rating System asks us to develop a list of faculty and/or staff engaged in sustainability research. It provides the following definition:

Sustainability research is research that leads toward solutions that simultaneously support social wellbeing, economic prosperity, and ecological health. It includes academic research that:

- Explicitly addresses sustainability and/or furthers our understanding of the interconnectedness of social, economic and environmental issues;
- Contributes directly toward solving one or more major sustainability challenge; and/or
- Engages community members with the aim of combining knowledge and action to achieve positive social, economic and environmental outcomes (e.g. participatory and community-based research and engaged scholarship)

This draft list was produced by Liz Davey from review of a redacted list of project proposal titles for 2013 and 2014 provided by the Office of Research. This draft list was distributed to SSE Department Chairs in June 2014.
